

The Infineer 96xx Card Centre Range

Description

The Infineer 96xx range of Card Centres have been designed to offer a user-friendly means of self-service card revaluation. They are easy to install and simple to use with low maintenance demands.

For any site that wishes to provide card revaluation outside normal office hours or cut back the involvement of staff in card revaluation, the use of Card Centres is ideal.

Infineer provide a range of Card Centre configurations, which include combinations of note acceptor and/or coin mechanism (i.e. note only, coin only, note & coin) with options to incorporate a dispenser channel and/or receipt printer. Cards centres use the following components: The Mars Cashflow 330 Coin Mechanism accepting up to 6 different coins and the GBA II Note Reader accepting up to 4 different banknote denominations.

Your ChipNet3 dealer will be pleased to guide you through the full range of Card Centre options.

Card Centres are designed for wall mounting and the 2mm secure steel cabinet is fitted with 3 x 10 Pin radial locks. The cabinet dimensions are 480 mm (w) x 280mm (d) x 730mm (h).

The 96xx range of Card Centres support TCP/IP network communications permitting robust real-time audit reporting and integration with existing LAN/WAN architectures.
