

## Intuitive ChipNet3 Task Wizards

### Description

In addition to the Task Pad care has been exercised to make the administrator's job as easy as possible, especially when carrying out day-to-day operations and routine maintenance. Wizards are used to guide the administrator through the execution of day-to-day management tasks such as replacing lost cards, installing a new terminal or running a report.

**Temporary / Replacement Card Wizard**

**Card Holder**

**Temporary / Replacement Card Wizard**

**Create Temporary Card**  
The Temporary Card can now be created.  
The Card Holder's original card will be 'Hotlisted' until returned for reactivation.

Create Card

To create the Temporary Card insert a blank card.  
Select the Create Card button.

[Create Card]

< Back Finish > Cancel

As can be seen from the screen shots above, which show how to create a temporary card, ChipNet3 has been designed with the user in mind and the ChipNet GUI structure is state of the art and intuitive. Not only does the extensive use of simple to follow wizards benefit the administrator they also significantly reduce the time taken to train new staff who may be unfamiliar with the operation of the system.
