

## **5050 Alphanumeric Account Terminal**

### **Description**

The 5050 is the ideal cost recovery solution of those businesses who need to monitor, control and/or charge for copies made, either internally within the organization or externally on behalf of clients yet do not want the expense of a complicated software driven network solution.

The 5050 features a full 45 key keypad making it easy to input complicated alphanumeric codes. Featuring three fields of entry, the terminal can track user, client and job activity, accrediting every copying episode or transaction with a time and date stamp. Working off-line, the 5050 can validate copying against as many as 20,000 client IDs.

Reports can be printed off by attaching a simple handheld printer to the serial port.

#### **Stand-alone Capacity:**

- Up to 2,000 (6 digit) User Codes
- Up to 20,000 (16 digit) Client Codes
- Up to 15,000 (8 digit) Job Codes
- Up to 3000 Transactions in Memory

The 5050 is the most cost effective account based copier control terminal on the market today!

### **Accessories**

PortPrint – Hand help report printer

***EasyCard the simple way to pay!***
