

## **6255 Copy Vending & Payment Terminal**

### **Description**

The 6255 terminal is a versatile magnetic card payment terminal, which can be interfaced to a photocopier, print release station or PC workstation. The 6255 terminal accepts both disposable and rechargeable EasyCards and the terminal operates in one of three modes:

**Copy Vending Mode** – In copy vending mode the terminal accepts both cards encoded with a cash value or a number of copies (or units). If rechargeable cards are used, they can be revalued at the terminal by an authorized member of staff. In copying mode, the 6255 provides up to four price lines, which facilitates charging for four different paper sizes. A special Audit Card provides access to the following information:

- Total number of copies taken by priceline
- Total number of external and override copies taken by priceline
- Total amount of cash and units deducted from card
- Total amount of cash and units added to cards during revaluations

**Networked Printing Charging Mode** – In networked printing mode, the 6255 terminal is combined with Infineer's SmartPrint CENTRAL software to provide a dedicated Print Release Station. Having created or edited their document, the user sends it across the network to the printer. The user must then select the job from a list at the print release station and insert a card for payment before the job can be printed.

**PC Time Charging Mode** – When used in conjunction with the Infineer EasyTime software, the 6255 is connected to the serial port on a PC. After logging on, the user is prompted to insert a card to pay for the session at the PC.

### **Accessories**

- OA0700 14 Way Photocopier Interface Cable
- 425000 Serial Interface Cable (PCTime & SmartPrint Central)
- 501500 Wall Mounting Kit
- 519908 System Mangers Guide
- 910021 System Manager Cards
- 910001 Box of 1,000 Disposable Cards
- 950006 Box of 1,000 Rechargeable Cards

**EasyCard the simple way to pay!**
