

92 Series Card Centres

Description

Card Centres have been designed to offer a problem-free means of self-service revaluation for rechargeable thin magnetic stripe cards. They are easy to install, simple to use with low maintenance demands.

The standard card centres are housed in our standard 2mm secure steel cabinet with 3 x 10 Pin radial locks. The 92 Series Card Centre range covers all possible card centre configurations with note only or coin & note acceptance delivered through a combination of the GBA II bill acceptor and the Mars Cash flow 330 multi-coin acceptor.

Any 92 Series Card Centre can also be supplied with the ability to dispense cards and print receipts if required. The unit is simple to install on any suitable wall and only requires provision of a standard power connection.

Once installed the unit is designed to make it easy for the administrator to empty the coin box and refill the dispenser channel if one is fitted. The 92 Series Card Centre is popular in busy environments where customers are continually returning to make copies or prints and use a rechargeable EasyCard.
