### 3 Upgrade Requirements

The ChipNet3 Dynamic Purse upgrade must be performed after the ChipNet3 database and software have been installed. The installation is a two-step process, the first is the server update that modifies the database, and the second is the client update that adds the dynamic purse functionality to the ChipNet3 clients.

The server update must be run on the machine that has the existing ChipNet3 database and it must be run only once. The client must be run on all the client machines and can be run as many times as is necessary.

**Please Note:**

Before beginning the installation, ensure that the ChipNet3 software has been updated to the latest version and the RS485 server and TCP/IP server are not running.

## 4 Updating the ChipNet3 Database

When installing ChipNet3 Dynamic Purse it is necessary to update the existing ChipNet3 database to incorporate the necessary dynamic purse tables. The dynamic purse database update must be run on the machine where the ChipNet3 database is installed.

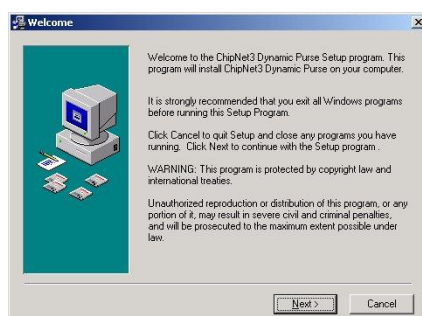

Please Note: Depending on the information available in the configuration file, some of the server and database information may not be requested.

To update the ChipNet3 database:

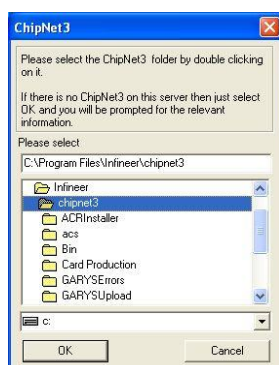

1. Ensure that all programs on the computer are shut down.
2. Insert the ChipNet3 Dynamic Purse update CD into the CD drive.
3. Browse to the CD drive using Microsoft Windows Explorer. A list of ChipNet3 DP update files and folders are displayed.
4. Open the **Dynamic Purse\Issue\Database Upgrade** folder.
5. Click on **DatabaseUpdate.exe**. The following screen is displayed:

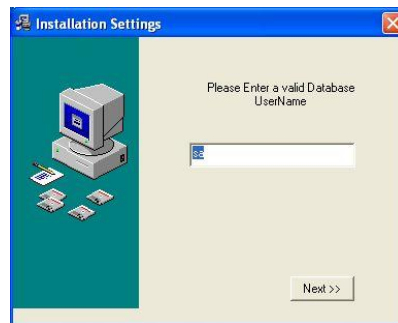

6. This screen signals the upgrade has been successfully launched. After a short wait the Welcome screen is displayed:

7. Click on the **Next** button. The following screen is displayed:

8. Select the folder that contains the ChipNet3 installation files and click on the **OK** button. The following screen may be displayed:

9. Type the username of the SQL server into the edit box and click on the **Next** button. The following screen may be displayed:

10. Type the password of the SQL database into the edit box and click on the **Next** button. The following screen may be displayed:

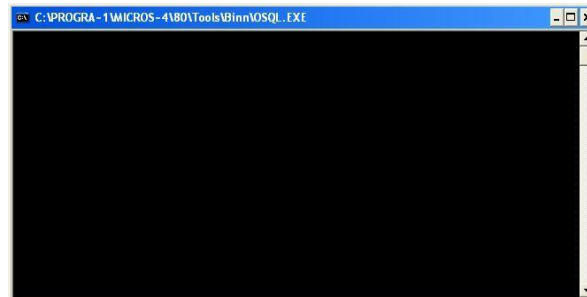

11. Type the SQL Server name into the edit box and click on the **Next** button. The following screen may be displayed:

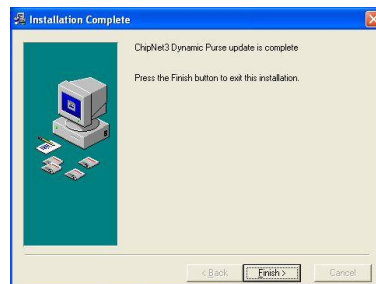

12. Type the database name into the edit box and click on the **Next** button. The following screen may be displayed:

13. This is the summary screen and if any data is incorrect please use the back button to navigate to the relevant form and correct the data. If the data is correct please click on the **OK** button. The following screen may be displayed:

14. Once the database scripts have completed the following screen will be displayed.

15. Click on the **Finish** button to exit the installation. The ChipNet3 database is now upgraded for dynamic purse.

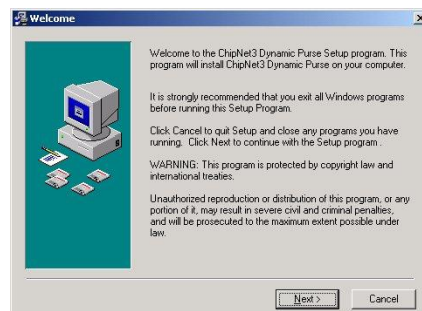

## 5 Updating the ChipNet3 Software

Once the database has been updated to include the new tables for dynamic purses, the ChipNet3 software must be updated on all the ChipNet3 client machines.

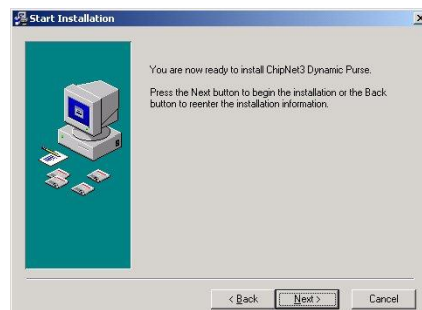

1. Ensure that all programs on the computer are shut down.
2. Insert the ChipNet3 Dynamic Purse update CD in the CD drive in the computer.
3. Browse to the CD drive using Microsoft Windows Explorer. A list of ChipNet3 Dynamic Purse update files and folders are displayed.
4. Open the **Dynamic Purse\Issue\Client Upgrade** folder.
5. Click on **ClientUpdate.exe**. The following screen is displayed:

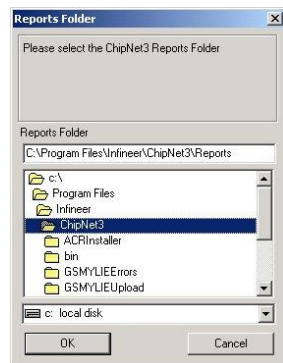

6. After a short wait the Welcome screen is displayed:

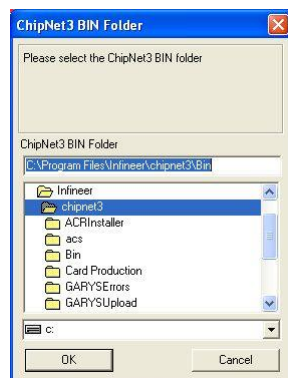

7. Click on the **Next** button. The Start Installation screen is displayed:

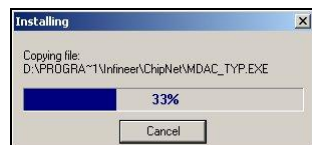

8. Click on the **Next** button. The Reports Folder screen is displayed:

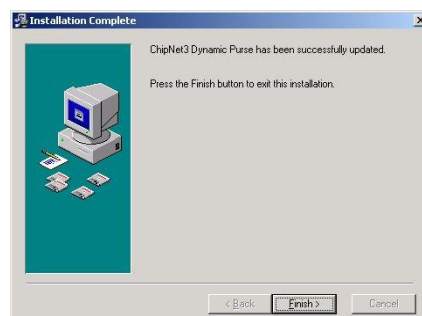

9. Select the folder that contains the ChipNet3 reports. Click on the **OK** button. The Bin Folder screen is displayed:

10. Select the folder that contains the ChipNet3 Bin files. Click on the **OK** button. The Installing screen is displayed:

11. Once the upgrade is complete, the Installation Complete screen is displayed.

12. Click on the **Finish** button. The installation of ChipNet3 is now updated to include the dynamic purse functionality.
