

Card Revaluation

Wide range of options with
ChipNet3!

What are the options?

ChipNet3 Cards can be revalued in a number of ways, tailored to suit every environment. Whether you run a large university or a small cafeteria, Infineer have a solution that will allow your ChipNet3 cards to be revalued quickly and efficiently.

Administrator – ChipNet provides a quick and convenient way for the administrator to revalue cards. ChipNet3 ACM tools allow an administrator to receive cash or cheques and efficiently record and allocate the value to the user's account. There is no need for the user's card to be handed to the administrator to complete the revaluation process.

Self Service – Card Centres are designed for busy sites, such as a university libraries or school cafeterias, where large numbers of people are loading cash every day. The Infineer 96xx range of Self Service Card Centres offer a comprehensive selection of configuration options, which allow the user to use coins or bank notes to add value to their ChipNet card.

Web Portal – By creating a secure, self-service web portal, cardholders can revalue their cards using a credit card or debit card over the internet. Talk to Infineer to see how a web portal could be created for your site.

Payroll – Using Infineer Payroll terminals, a link can be created between ChipNet and your payroll software. Cardholders can transfer funds from their salary, directly to their card.
