

6650 Copy Vending Terminal

Description

The Infineer 6650 can be fitted to a wide range of host equipment including photocopiers, copy duplicators and microfiche reader printers, providing the ultimate in flexibility and control for those organisations wishing to sell and control copies.

The Infineer 6650 can automatically charge up to four price lines so you can price according to copy type and paper size, for example A4 colour, A4 black and white, A3 colour and A3 black and white.

For added security, a deposit is deducted from the user's card when initially inserted, in case the chipcard is prematurely removed from the reader and copying is left unpaid for. This deposit is refunded to the user's card at the end of the transaction. If required, PIN protection can be implemented at the 6650 terminal. As with other terminals in the ChipNet3 range, it is possible to accept or deny payment for copies with subsidy, discount or departmental allowances. A tax facility also applies.

The 6650 terminals support TCP/IP network communications permitting robust real-time audit reporting and integration with existing LAN/WAN architectures.

In addition, if the appropriate ChipNet3 software module is implemented on your site, the 6650 terminal can accept a numeric Job Code, which allows copies taken to be allocated to a particular cost centre in addition to the User and User Group activity recorded as part of the standard ChipNet3 reports. For more information please see the appropriate ChipNet3 Application Focus datasheet.

Accessories

- OA0700 Photocopier Interface Cable
- Copier Specific Connection Kit
- 515200 Cleaning Cards (20 Pack)
- 515300 Cleaning Cards (100 Pack)
