

8653 Micro Point of Sale Terminal

Description

The Infineer 8653 Micro Point-of-Sale has been designed to give basic POS functionality at a very low price.

The 8653 terminal does not have any pre-defined pricelines or look-ups; the operator simply inserts the user's card, keys in the value to be deducted and completes the transaction. A refund facility exists if an amount is entered incorrectly.

A typical application might be in a library using ChipNet3 to pay for prints and copies. In this example the counter staff could use an 8653 terminal to deduct library fines from users' cards. Or the library staff could sell pencils and other low cost consumable items and use the 8653 to record the transaction.

The 8653 terminals support TCP/IP network communications permitting robust real-time audit reporting and integration with existing LAN/WAN architectures.

The 8653 can be restricted to deduct value from the ChipNet3 "cash" purse only, or it is possible to also use the special features of the ChipNet3 Discount, Subsidy or Allowance purses with this terminal.

Accessories

- 515200 Cleaning Cards (20 Pack)
- 515300 Cleaning Cards (100 Pack)
